

Maturity Self-Assessment

Pillar	1 [low]	3 [intermediate]	5 [optimal]
Strategy fit	Ad-hoc AI experiments	AI aligns with key OKRS	Multi-year strategic AI roadmap
Data Foundation	Fragmented, siloed	Centralized, partial lineage	Unified, real-time data mesh
Tech Stack	Uncoordinated tools	Centralized model management	Unified reasoning & GPU orchestration
People & Skills	Individual projects	Certified AI specialists	Enterprise-wide AI enablement
Governance	No formal guardrails	Basic policies exist	Automated AI governance & audits

AI Maturity Scoring Guide

Score 1	Score 2
Low – "Exploring"	Emerging
You're in the early stages with AI. Efforts are ad-hoc, experimental, and typically isolated. Limited strategic direction or coordination exists. No clear governance or dedicated infrastructure is in place yet.	Initial steps have been taken—some pilot projects or experiments exist. There's basic awareness, but your AI approach is reactive rather than proactive. Limited integration or strategic alignment is evident.
Score 3	Score 4
Intermediate – "Adopting"	Advancing
AI initiatives are becoming aligned with specific business goals or OKRs. Basic infrastructure and centralized tools exist, but consistency and scalability are still challenging. Initial governance and skill-building are underway.	AI capabilities are consistently aligned with strategic objectives and actively integrated into your workflows. You're seeing measurable results, supported by solid infrastructure and dedicated AI talent. Governance and compliance processes are largely automated.
	Score 5
	Optimal – "Scaling & Optimizing"
	You're leading in AI maturity. AI initiatives fully align with multi-year business strategy. Robust infrastructure, seamless integration, and organization-wide AI literacy exist. Automated governance and real-time performance tracking are the norm, consistently driving measurable, repeatable ROI.

How to Use Your Score

Overall score	Overall score	Overall score
5–9	10–17	18–25
You're at the early stages. Prioritize strategy definition, data foundations, and building core skills.	You're making progress. Focus next on governance automation, consistent data integration, and scaling existing successes.	You're highly mature. Continue refining KPIs, optimizing ROI, and leveraging advanced AI methods to stay competitive.
